

Edit Lab

Our edit lab is outfitted with computers loaded with Final Cut Pro X, a professional digital video editing software. CATV will temporarily lend you a hard drive for your raw footage and project while you edit your production.

Have little or no experience editing? CATV staff will get you started and provide you with editing assistance throughout your process.

You can make an appointment to edit your production by calling CATV at: 802-295-6688 or by emailing info@catv8.org

Live Multi-Camera Studio

CATV's studio is equipped with three cameras, a fully lighted, digital video studio and a master control room.

This studio has been used as a platform for selectmen and gubernatorial candidates to reach the public. Talk shows, dating shows, and musical performances have also been recorded here. We have the ability to broadcast live studio shoots that are available to Upper Valley cable subscribers.

To schedule a studio shoot. Email Production Coordinator, Sophie Bodnar at sophie@catv8.org
